MODBOX III Cabinets

Molex Premise Networks is pleased to announce change of 19" cabinets MODBOX III family. The frame was changed to get improved rigidity and easier assembly. Also packaging was improved to avoid of any damage during transportation. Now each cabinet is delivered in three packs. The main pack includes covers and glass doors, is protected by durable wooden frame. There was also modified roof construction. Top perforation was moved on back wall. It avoids from dropping water penetration.

Please note that overall dimensions are the same as in previous version. Also previous accessories can be used together with new cabinets. It allows keeping part numbers unchanged.

Yours sincerely

Marcin Bujak
Product Manager
